

**Old Photo vs. Walgreens®.** This test was done 7/1/08 at the Walgreens® on the East side of Sun Prairie. We think the results speak for themselves. Make sure you get what you are expect. You are only going to do this job once. Make sure you get it done right. Always get free sample scans to test your scanning service.

These scans, below, are from a **127 Super Slide**. Notice that the Walgreens® scan is cropped down and you do not get the whole slide. Note the color corrections by Old Photo's Photoshop artists. You get this expert color work on each scan. Many discolored images can be brought back to life again by our experts. No extra charge! You won't get this at Walgreens®.

**Old Photo Scan**

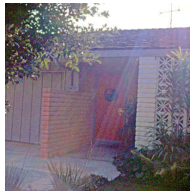

**Walgreens® Scan**

**Old Photo Scan**

**Walgreens® Scan**

These scans, below, are from a **120 size slide**. 120 slides are almost square. Notice how Walgreens® cropped the top and bottom off the scan and then left the black bars on the sides. We scan the whole 120 slide and we precision crop each image so there are no black bars or dirty edges.

**Old Photo Scan**

**Walgreens® Scan**

**Walgreens® Scan**

These scans, directly below, are from the **110 size slide**. Notice how the Old Photo slide scan is zoomed in and the Walgreens® slide scan has black on all sides. Also notice how the highlights and details of the Walgreens scan are all blown away. Our final 110 slide scans will be blown up to almost the same size as regular 35mm scans.

**Old Photo Scan**

The remaining examples are 35mm slide scans.

With our **low prices and expert Photoshop enhancement** of every scan, there is no good reason to go with low quality scanning results when you are transferring your precious family photos, slides, photos and films. You are only going to do this job once so get it done right the first time. We offer to scan ten of your slides and photos and create a free DVD slide show disk so that you can see our results on your TV set. Don't pass up this opportunity to have your slides and photos digitized properly.
